

Colleagues,

Minutes: Webex Monday, October 20, 2014 at 11:00 AM Eastern Daylight Time.

Agenda: Planning/preparation for November. The 802.24 IoT group developing scope to form an IoT vertical applications group under 802.24 will meet during the IEEE 802 November Plenary session Wednesday, 5 November, 16:00-18:00.

- Discussion on IoT TG Scope (from review in July):
Forum to discuss substantive basis for applying 802 standards to evolving "IoT" application space and to gather together like minded experts interested in exploring the topic. The task group is to focus on the application of 802 standards to connecting endpoints (sensors, actuators, "things") to the Internet "IoT".
 - Comments that the IoT TG should focus on technical contributions addressing (use cases) and potential gaps in 802 standards.
 - Add 802.1 Network Architecture and Automotive (,11p vehicle to vehicle) to white paper developments.

- Additions to white paper development area's added (proposed and potential) champions following discussions.
 - Industrial Automation – Robert Voss/Panduit
 - Data Center Management - Mike Bennet/3MG Consultancy (environmental, facilities)
 - Security/Video Networks- Wireless/Wired - Andy Jimenez/Anixter
 - Building Automation – TBD – Bruce Nodman (Mike Bennett) -
 - Automotive – TBD – (11p vehicle to vehicle)
 - 802.1 – Network Architecture - TBD

Regards,

Mike Bennett - 3MG Consultancy
Chris DiMinico – MC Communications/Panduit
