

Immediate Release – May 9, 2000

## MEGAXESS & NDC Offer Wireless IAD (WIAD) with QoS to enable wireless multi-service solutions for businesses

Germantown MD, May 9, 2000 –

MEGAXESS and National Datacomm Corporation announced new Wireless Integrated Access Device (WIAD) with Quality of Service Negotiator (QoSN™) that enables businesses to access multi-service applications of Enterprise and other INTERNET Infrastructures.

The partnership brings MEGAXESS, known for its Quality of Service (QoS) Assurance Products within the network infrastructure, together with National Datacomm Corporation, known for its cost-effective, high quality wireless product lines.

Offering IEEE 802.11 standard compliant speeds of 2 Mbps and 11 Mbit/s with enhanced network management, the WIAD system configurations offer robust wire-free operations in business premises with flexibility to use services concurrently. Quickly deployable, and IEEE 802.11 conformant the new products will offer bandwidth management and uninterrupted multi-service functionality.

“Integrating MEGAXESS’s multi-service QoS Technology into NDC’s wireless LAN enables multiple customized system configurations to be deployed. Megaxess products allow offering of differentiated services,” said Dr. Dhadesugoor R Vaman, Chairman & CEO, MEGAXESS, Inc.

“With the 802.11 wireless LAN standard rapidly gaining momentum on the business premises, the incorporation of MEGAXESS’s industry leading multi-service QoS Assurance Technology into the wireless LAN systems will significantly expand the horizons of wireless applications,” said Changhua Chiang, CEO of National Datacomm Corporation.

# Press Releases

## **About the Product Offering**

Megaxess offers a variety of products and subsystems for customizing the Business Premises configuration:

**WIAD System** consisting of IEEE 802.11 Broadband Access Point with QoS Router.

**Wireless PCMCIA Card** for LAPTOPs.

**Wireless PCI Card** for Desktops.

**Network Management System** for management operations.

**QoS Negotiator (QoSN™)** for QoS management across the network.

## **About MEGAXESS INC.**

MEGAXESS Inc is the leader in the development of QoS (Quality of Service) assurance products in the backbone, enterprise and access networks. MEGAXESS' QoS assurance products enable end-users to operate with reliable fault tolerance management. Megaxess products including HQ™ and QoSN™ can be flexibly configured at the edges of core network, service provider network, enterprise network and broadband access networks. Therefore, all network transports including ATM, DWDM, IP and Frame Relay can use the products to support differentiated services. All of the products can be easily integrated into a global network management system to facilitate managing services thus increasing productivity and cost effective emergency maintenance. For more information about MEGAXESS please visit the company's web site <http://www.megaxess.com> or call (301) 540-2600.

## **About National Datacomm Corporation**

Founded in 1990 with a corporate mission of "maximizing the convenience of networking," NDC provides convenient, comprehensive and affordable wired and wireless networking products to the business and consumer segment. NDC has been one of the leading suppliers of wireless LAN products for global OEMs and wireless solution providers since 1995. Complying with IEEE 802.11 2 Mbit/s FHSS and 11 Mbit/s DSSS, NDC's InstantWave networking product family focuses on corporate users to deliver the distinctive value proposition of "more Net, Less Wire". NDC is a member of Blue Tooth, WECA and HomeRF alliance. For more information on NDC and its products, visit the company's website at <http://www.ndc.com.tw>.
