4.2 Expected Date of Submission for Initial Sponsor Ballot: 2009-01

4.3 Projected Completion Date for Submittal to RevCom: 2009-12

5.1 Approximate number of people expected to work on this project: 50

5.2 Scope of Proposed Standard: This standard represents the Protocol Implementation Conformance Statement(PICS) Proforma, per ISO/IEC Standard 9646-7 (1995) and ITU-T X.296, for the conformance specification of base stations **or access nodes**, and access terminals **or user terminals**, based upon the air interface specified in IEEE P802.20.

5.3 Is the completion of this standard is dependent upon the completion of another standard: Yes

If yes, please explain: The standard will relate to conformance to IEEE802.20. Work under this PAR can progress based on the draft but cannot be completed until the 802.20 specification is complete. The 802.20 draft is currently in Sponsor Ballot, and completion is expected soon.

5.4 Purpose of Proposed Standard: This document describes the capabilities and options within the air interface specified in IEEE P802.20. It is to be completed by the supplier of a product claiming to implement **one or more of** the protocol **modes**. It indicates which capabilities and options have been implemented. It allows a user of the product to evaluate its conformance and to determine whether the product meets the user's requirements.

5.5 Need for the Project: This standard is needed to aid potential users of **IEEE P802.20** products in determining whether or not the product meets the user's requirements.

5.6 Stakeholders for the Standard: 802.20 equipment suppliers, service providers, and users.
