IEEE 802® family of standards revolutionized the world.

You're invited

Who: **Students and faculty members**
What: **IEEE 802® Plenary Meeting**
When: **17 July 2012**
Where: **Manchester Grand Hyatt, San Diego**
Cost: **Special Discounted Registration fee of only $25.00**

Now is your chance to see for yourself how this accomplished group works, and find out how to help engineer the next round of innovative and globally-impacting standards.

By attending this event you will expand your knowledge of the standards development process while learning the significance of standards within engineering technology. You might even consider future participation in the standards development process or get involved in other IEEE Standards Education Committee programs. Attending faculty members may choose to incorporate "standards role within engineering" into your curriculum, if not already doing so.

Whatever role you play or however you choose to participate, your involvement is key to our future success and could also be the key to yours!

About IEEE 802

The IEEE 802® LAN/MAN Standards Committee (LMSC) develops local and metropolitan area network standards. The most widely used standards are for Ethernet LANs, Wireless LANs, Wireless PANs, Wireless MANs, and Bridging and Virtual Bridged LANs. An individual working group provides the focus for each of these areas. For more information about the IEEE 802 LAN/MAN Standards Committee, see http://ieee802.org

About the IEEE Standards Association

The IEEE Standards Association, a globally recognized standards-setting body within IEEE, develops consensus standards through an open process that engages industry and brings together a broad stakeholder community. IEEE standards set specifications and best practices based on current scientific and technological knowledge. The IEEE-SA has a portfolio of over 900 active standards and more than 500 standards under development.
