Abstract: This document provides responses to FDIS 60 days ballot comments on IEEE Std. 802.22-2011

Request to SC6 to allocate revision responsibility of the ISO/IEC/IEEE 8802-22 Standards to the IEEE 802.22 Working Group

- IEEE 802.1/3/11/22 standards are being liaised to ISO/IEC JTC1/SC6 for ratification under the PSDO based on an agreement by SC6 that the relevant IEEE 802 WG has responsibility for the revision process
- The agreement by SC6 is based on the existence of an established mechanism for NBs to contribute to the revision process in the IEEE 802 WG
 - This process is documented in N15606  N15606
- The agreement was ratified by resolutions in SC6 in relation to each of IEEE 802.1/3/11
- IEEE 802.22 WG requests a similar agreement in relation to ISO/IEC/IEEE 8802-22 Standards

Request to SC6 to allocate revision responsibility of the ISO/IEC/IEEE 8802-22 Standards to the IEEE 802.22 Working Group

Proposed liaison to SC6 (part 1/2)

- *The IEEE 802.22 Working Group is currently making use of the PSDO agreement between ISO and IEEE to enable ISO/IEC JTC1 NBs to review and ratify IEEE 802.22 standards as ISO/IEC/IEEE 8802-22 standards*
- *The IEEE 802.22 Working Group is using the same processes as those being used to enable the review and ratification the ISO/IEC/IEEE 802-1/3/11 series of standards, including those processes specified in 6N15606*
- *ISO/IEC JTC1/SC6 has made the use of those processes the basis of resolutions within SC6 to allocate responsibility for the revision process of the ISO/IEC 8802-1/3/11 series of standards to the relevant IEEE 802 Working Group*

Request to SC6 to allocate revision responsibility of the ISO/IEC/IEEE 8802-22 Standards to the IEEE 802.22 Working Group

Proposed liaison to SC6 (part 1/2)

- *The IEEE 802.22 Working Group requests that SC6 adopts the following similar resolution with respect to the ISO/IEC/IEEE 8802-22 series of standards*
 - *As empowered by clause A1.2.1 of the PSDO agreement between ISO and IEEE, SC 6 decides to allocate responsibility for the revision process of the ISO/IEC/IEEE 8802-22 series of standards to the IEEE 802.22 Working Group while the IEEE 802.22 Working Group has an ongoing revision process for the IEEE 802.22 standard. A condition of this resolution is that SC 6 and its NBs have access to an established mechanism to contribute to the revision process in the IEEE 802.22 Working Group .*
- *Note that this proposed resolution is in the same form as Resolutions 6.1.9/10/11 that were approved in September 2012 at the ISO/IEC JTC 1/SC 6 plenary meeting in Gratkorn/Graz, Austria*
