Subject: Liaison response on the establishment of a formal bi-directional liaison between IEEE 802 and CDHN WG

Dear Paul Nikolich,

The 1905.1 WG received your liaison request sent on 22 November 2013.

As established earlier by the WG, Philippe Klein continues to serve as official liaison from CDHN to 802. He will provide regular updates on the technical development progress of the IEEE 1905.1a working group.

During the Orlando face to face meeting, the work was advanced and we are working towards an expedited schedule.

At this point of time, the WG does not anticipate modifying or adding material that will impact 802 related technologies.

Philippe Klein will be present at the March 802 plenary meeting.

Sincerely

Purva Rajkotia,
Chairman of IEEE Convergent Digital Home Network (CDHN) Working Group
