

Colleagues, These latest reports still show our number are very low for this Session especially from the US and Europe, so we should not expect a record turn-out on this one. But we do have an extra group of guests from our local hosts in Singapore that will fill up some of that extra space.

The only groups with significantly increased numbers are from Singapore and India. Korea and Japan are close to normal and PRC and Taiwan are actually down from normal in the US. So apparently holding a Session in Asia does NOT attract significantly more attendees from Asia or Australia.
